***Accounting Policies (continued)***

**Stocks**

Stocks are stated at the lower of cost and net realisable value. In the case of finished goods and work in progress, cost is defined as the aggregate cost of raw material, direct labour and the attributable portion of direct production overheads. Net realisable value is based on normal selling price, less further costs expected to be incurred to disposal.

**Foreign Currencies**

Transactions in foreign currencies are recorded at the rate ruling at the date of the transactions or at a contracted rate. The resulting monetary assets and liabilities are translated at the balance sheet rate or the contracted rate and the exchange differences are dealt with in the profit and loss account.

**Taxation**

The yearly charge for taxation is based on the profit for the year and is calculated with reference to the tax rates applying at the balance sheet date. Deferred taxation is calculated on the differences between the company's taxable profits and the results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements. The full deferred tax effect is recognised on differences between amounts funded and amounts charged to the profit and loss account in relation to pensions and other post retirement benefits. In calculating the amount of deferred tax, discounting is used.

**Turnover**

Turnover represents net sales to customers and excludes Value Added Tax.

**Financial Instruments**

**Ordinary Share Capital**

The ordinary share capital of the company is presented as equity.

**Cash and Cash equivalents**

Cash consists of cash on hand and demand deposits.

**Other financial liabilities**

Other financial liabilities, including trade creditors, are initially measured at transaction price less transaction costs, and are subsequently measured at the transaction price less transactions costs not yet recognised in the profit and loss and repayments plus cumulative interest expenses incurred.

**Impairment of financial assets**

At the end of each reporting period, the company assesses whether there is evidence of impairment of any financial asset, including investments, loans, trade debtors and cash. If there is evidence of impairment losses are recognised in the Profit and Loss account in that financial year.
