The financial reporting framework that has been applied in their preparation is the Companies Act 2014 and FRS 105 "The Financial Reporting Standard applicable to the Micro-Entities Regime" issued by the Financial Reporting Council.

Turnover

Turnover comprises the invoice value of services supplied by the company, exclusive of trade discounts and value added tax.

Intangible assets

Goodwill

Purchased goodwill arising on the acquisition of a business represents the excess of the acquisition cost over the fair value of the identifiable net assets when they were acquired. Purchased goodwill is capitalised in the Statement of Financial Position and amortised on a straight line basis over its economic useful life of 5 years, which is estimated to be the period during which benefits are expected to arise. On disposal of a business any goodwill not yet amortised is included in determining the profit or loss on sale of the business.

Tangible assets and depreciation

Tangible assets are stated at cost or at valuation, less accumulated depreciation. The charge to depreciation is calculated to write off the original cost or valuation of tangible assets, less their estimated residual value, over their expected useful lives as follows:

Plant and machinery	- 20% Straight line
---------------------	---------------------

The carrying values of tangible fixed assets are reviewed annually for impairment in periods if events or changes in circumstances indicate the carrying value may not be recoverable.

Trade and other debtors

Trade and other debtors are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method less impairment losses for bad and doubtful debts except where the effect of discounting would be immaterial. In such cases the receivables are stated at cost less impairment losses for bad and doubtful debts.

Trade and other creditors

Trade and other creditors are initially recognised at fair value and thereafter stated at amortised cost using the effective interest rate method, unless the effect of discounting would be immaterial, in which case they are stated at cost.

Taxation

Current tax represents the amount expected to be paid or recovered in respect of taxable profits for the financial year and is calculated using the tax rates and laws that have been enacted or substantially enacted at the Statement of Financial Position date.
