Historical cost is generally based on the fair value of the consideration given in exchange for assets. Property, plant and equipment and depreciation

Taxation and deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more tax in the future, or a right to pay less tax in the future. Timing differences are temporary differences between the company's taxable profits and its results as stated in the financial statements.

Deferred tax is measured on an undiscounted basis at the tax rates that are anticipated to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the Statement of Financial Position date.

Ordinary share capital

The ordinary share capital of the company is presented as equity.

3. Significant accounting judgements and key sources of estimation uncertainty

Economic Factors

Global political and economic unrest stemming from the ongoing conflicts in Ukraine and Gaza, as well as escalating trade tensions between major global economies have contributed to significant price inflation and has created a very volatile economic environment both domestically and internationally. The directors will continue to closely monitor and assess these evolving risks and will take proactive measures as necessary to safeguard the company's operations and maintain steady cash flows.

4. Going concern

The financial statements have been prepared on a going concern basis. At the balance sheet date, the Company shows net liabilities of €84,035 (2024: €13,421), which arises primarily due to deferred income of €321,386 recognised in respect of payments received in advance for an event scheduled to take place after the year end. The directors consider that this position does not indicate any underlying liquidity or solvency concern and have a reasonable expectation that the Company will continue in operational existence and liabilities will be discharged as they fall due for the foreseeable future which is 12 months from the date of signing the financial statements.
