Trade and other debtors

Trade and other debtors are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method less impairment losses for bad and doubtful debts except where the effect of discounting would be immaterial. In such cases the receivables are stated at cost less impairment losses for bad and doubtful debts.

Trade and other creditors

Trade and other creditors are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities.

Creditors and accruals including amounts owed to group companies are recognised initially at transaction price (including transaction costs). For trade creditors where the payment is beyond normal credit terms it is held at the present value of all future payments using the imputed rate of interest or the cash price for the goods or services where material. Where loans are advanced it is carried at the transaction price (including transactions cost where material) regardless of whether a financing arrangement exists. Subsequently these are measured at transaction price less transaction costs not yet recognised, plus any unwinding of the discount on transactions initially recognised at present value/cash value, less repayments, plus advances. Transaction costs including any amounts deferred on purchases where payment is deferred beyond normal credit terms are released to the profit and loss on a straight line basis over the length of the contract.

Current tax represents the amount expected to be paid or recovered in respect of taxable profits for the financial year and is calculated using the tax rates and laws that have been enacted or substantially enacted at the Balance Sheet date.
