Stocks and work in progress

Stocks are valued at the lower of cost and net realisable value. Stocks are determined on a first-in first-out basis. Cost of long term contracts includes all direct costs and attributable profits. Provision is made in full for any foreseeable losses.

Long term contracts are assessed on a contract by contract basis and reflected in the profit and loss account by recording turnover and related costs as contract activity progresses. No profit is recognised until the outcome of a long term contract can be assessed with reasonable certainty. Work in progress represents costs incurred net of amounts transferred to costs of sales, less foreseeable losses and applicable payments on account not matched with turnover.

Trade and other debtors

Trade and other debtors are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method less impairment losses for bad and doubtful debts except where the effect of discounting would be immaterial. In such cases the receivables are stated at cost less impairment losses for bad and doubtful debts.

Borrowing costs

Borrowing costs relating to the acquisition of assets are capitalised at the appropriate rate by adding them to the cost of assets being acquired. Investment income earned on the temporary investment of specific borrowings pending their expenditure on the assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Trade and other creditors

Trade and other creditors are initially recognised at fair value and thereafter stated at amortised cost using the effective interest rate method, unless the effect of discounting would be immaterial, in which case they are stated at cost.
