

# **Synergy Building Consultants Ltd**

## **Dormant Financial Statements**

**for the year ended**

**31 January 2026**

**Company Registration Number: 675117**

### **Cash Flow Statement**

The company meets the size criteria for a small company set by the Companies Act 2014 and therefore in accordance with FRS 1: Cash Flow Statements it has not prepared the cash flow statement.

### **Tangible Fixed Assets**

Tangible fixed assets are stated at cost less accumulated depreciation.

Cost includes prime cost, overheads and interest incurred in financing the construction of tangible fixed assets. Capitalisation of interest ceases when the asset is brought into use.

The company undertakes a review for impairment of fixed assets if events or changes in circumstances indicate that the carrying amount of the fixed asset may not be recoverable. To the extent that the carrying amount exceeds the recoverable amount that is the higher of net realisable value and value in use, the fixed asset is written down to its recoverable amount. The value in use of fixed assets is determined from estimated discounted future net cash flows.

### **Depreciation**

Depreciation is provided at rates calculated to write off the cost less residual value of each Asset over its expected useful life, as follows:

Fixtures, fittings and equipment 25%, Depreciation is charged over the useful life of each asset on a straight line basis.

Motor Vehicles, Depreciation charge 25% straight line basis

### **Stocks**

Stocks are stated at the lower of cost and net realisable value. Costs include all expenditure in bringing each product to its present location and condition. Net realisable value is based on estimated normal selling price less further costs expected to be incurred to completion and disposal. Provision is made for obsolete, slow moving or defective items where appropriate. In the case of work in progress, cost is defined as the aggregate cost of raw material, direct labour and a attributable proportion of direct production overheads.

### Leased Assets

Assets obtained under hire purchase contracts and finance leases are capitalised as tangible assets and depreciated over the shorter of the lease term and their useful lives. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The future element of the rental payment is charged to the profit and loss account so as to produce constant periodic rates of charge on the net obligations outstanding in each period.

### Foreign Currencies

Transactions in foreign currencies during the year have been recorded at the rate ruling at the date of the transaction or at a contracted rate, where the transactions are the subject of a forward contract. Assets and liabilities denominated in foreign currencies have been translated to Euro at the rate of exchange ruling at the balance sheet date. Gains and losses arising from exchange movements are included in the profit and loss account.

### Taxation

The charge for tax is based on the profit for the year. Deferred taxation is calculated on the differences between the companies taxable profits and the results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised on differences between amounts funded and amount charged to the profit and loss account in relation to pensions and other post retirement benefits. In calculating the amount of deferred tax, discounting is used where appropriate.

### Turnover

Turnover represents the invoiced value of sales to customers, excluding Value Added Tax, of goods and services in the normal course of business.
